

THE CRISIS OF PSYCHOANALYSIS AND THE CHANGE OF THE PSYCHOANALYTICAL INSTITUTIONS

Rezumat: *The anniversary of 100 years from the foundation of the International Psychoanalytical Association (IPA), under whose sign the Romanian Society of Psychoanalysis holds its conference this year, draws attention to the importance of institutional problems for the development of psychoanalysis. I intend to address especially those particular aspects (conflicts, repeated splits, the organization of formation) that led to changes within psychoanalytic institutions. I will also review the perspectives of psychoanalytic institutions in the near future.*
