

EMIGRATION TO THE LAND OF HATE

Rezumat: *Hate it shows both as a strong connection with other (we are able to hate, sometimes longer and more intense than we love) but, at the same time, the hate is the expression of the rupture itself, an anti-link, a non-link. When the self-representation is not in accord with an ideal image of ourselves, we despise ourselves, we will be vulnerable to object relations and we perceive others as being in disagreement with us, as critical, unable to love us. Using the projection we come to hate them. Hate is linked to a specific pathology of narcissism and of unfavorable attitudes towards self-representations.*
