

SELF-HATE AT ROMANIANS

Rezumat: *The advanced and discussed hypothesis is that self-hatred constitutes one of Romanians major psychic problems, mainly derived from the dysfunctions of their social and private life. The reasons of self-hatred, its developing way and its manifestations in the communist totalitarian system and in the pre-communist history of Romania will be approached.*

Cuvinte cheie: self-hate, culture of the void, narcissism of death, communism, resentment, humour.
